

Tuesday 2nd April 2019

Buying a Chromebook

Dear Parents and Carers,

Many of you have already joined the Chromebook programme and your child, no doubt, is enjoying the benefits of using the device in and out of school. A few families may have previously missed out on the opportunity to join the program so we are now offering you an additional opportunity to join this popular programme.

We have worked with the creators of the scheme to provide you with a very competitive offer for purchasing a Chromebook which is our chosen device that will integrate with all the learning tools that we provide here at the school. The devices come with insurance, warranty and protective casing. By using the school's buying power and dealing with the IT provider directly, we have achieved significant savings against standard retail prices.

What we are suggesting to parents is for you to commit to a fixed, monthly payment that will provide your son / daughter with their own personal device that they can use at home and at school. This package will also include all necessary insurance and warranty costs.

The new portal to buy a Chromebook is open from 24th April 2019 and the deadline to purchase is 10th July 2019. Ordering portal details will be open and supplied by the scheme provider on the 24th April at 14:00 – 16:00 at the school.

Please feel free to visit the school on the 24th April for the information pack on how to purchase a Chromebook. If you need any assistance placing an order or for more information on the scheme, please contact Mr Muruts at Wapping High School on the main school number or via email at: YousefMuruts@wappinghigh.org. If you do decide to contact me I will be more than happy to explain the scheme to you and offer any advice or assistance.

Yours faithfully,

Yousef Muruts
IT Network Manager
